## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-4, 6-8, 14-16 are rejected under 35 U.S.C. 102(b) as being anticipated by Li et al.

Regarding claims 1, 4, Li et al., discloses a study of residual strain of a K<sub>2</sub>O·6TiO<sub>2</sub>w/Al with features of the claimed invention including a method for determining mechanical parameter of a composite material with two distinct phases including measuring a specimen's parameter relating to plurality of points lying at different distances from an interface between the phases and determining a mechanical parameter (see first paragraph of page 1420).

Regarding claim 2, Li et al., show the use of plurality of samples (see, for example, table 1).

Regarding claim 3, the provision of temperature range is an indicative of provision of different temperature (see, page 1424).

Regarding claims 6-8, Li's composite and specimen show similar characteristics (see first page).

Regarding claim 14, the measurements are carried out by diffraction of a convergent electron beam (see, the last paragraph of page 1421).

Art Unit: 2855

Regarding claims 15-16, the method includes the observation of Holz (see first page).

3. Claims 5, 9-13, 17-18 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
  
4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Max H. Noori whose telephone number is (571) 272-2185. The examiner can normally be reached on Tuesday-Friday from 8:00 AM to 6:00 P.M.
